D. Y. PATIL TECHNICAL CAMPUS,

FACULTY OF ENGINEERING & FACULTY OF MANAGEMENT, TALSANDE

Department of Computer Science & Engineering (Academic 2026-27)

Weekly Internship Report

Student Name:	Priyanka Raju Mohole.	**Roll No.:**	4051
Company Name:	Zaalima Development Ptv Ltd	**Place:**	Bangalore
Week Duration:	From: 25 June 2026 To: 25 Aug 2026	**Reporting Week No.:**	1
Company Mentor:	Mr . Padmalabha Gouda		

Work Summary (Tasks/Activities Performed During the Week):

Sr. No.	Date	Task / Activity Performed
1	8 June	Introduction to web development and MERN stack
2	9 June	HTML and CSS fundamentals
3	10 June	JavaScript fundamentals
4	11 June	Functions, arrays and objects
5	12 June	DOM manipulation
6	13 June	Asynchronous JavaScript and API basics

Weekly Progress Summary (Work completed during this week):

During the first week, I learned the fundamentals of web development and gained an understanding of the MERN stack. I studied HTML5 and CSS3 for creating and designing web pages and learned JavaScript fundamentals, including functions, arrays and objects. I also practiced DOM manipulation and asynchronous JavaScript concepts. Additionally, I learned the basics of APIs and how they are used to exchange data between applications. This week provided a strong foundation for learning React.js and full-stack development.

Weekly Internship Report

Student Name:	Priyanka Raju Mohole	**Roll No.:**	4051
Company Name:	Zaalima Development Ptv Ltd	**Place:**	Bangalore
Week Duration:	From: 25 June 2026 To: 25 Aug 2026	**Reporting Week No.:**	2
Company Mentor:	Mr . Padmalabha Gouda		

Work Summary (Tasks/Activities Performed During the Week):

Sr. No.	Date	Task / Activity Performed
1	15 June	Introduction to React.js and React project setup
2	16 June	Learned JSX and React components
3	17 June	Practiced props, state and event handling
4	18 June	Worked with forms and form validation in React
5	19 June	Learned React Hooks and component lifecycle
6	20 June	Practiced React Router and developed a basic React application

Weekly Progress Summary (Work completed during this week):

During the second week, I learned the fundamentals of React.js and understood how it is used to develop interactive user interfaces. I worked with JSX, functional components, props, state and event handling. I also learned how to create and validate forms and studied React Hooks for managing state and component behavior. In addition, I practiced React Router for navigation between different pages. By the end of the week, I developed a basic React application using reusable components.

Weekly Internship Report

Student Name:	Priyanka Raju Mohole	**Roll No.:**	4051
Company Name:	Zaalima Development Ptv Ltd	**Place:**	Bangalore
Week Duration:	From: 25 June 2026 To: 25 Aug 2026	**Reporting Week No.:**	3
Company Mentor:	Mr . Padmalabha Gouda		

Work Summary (Tasks/Activities Performed During the Week):

Sr. No.	Date	Task / Activity Performed
1	22 June	Introduction to Node.js and npm
2	23 June	Learned Express.js framework and server setup
3	24 June	Practiced REST APIs and HTTP methods
4	25 June	Worked with middleware, routing and error handling
5	27 June	Introduction to MongoDB and Mongoose
6	28 June	Implemented CRUD operations and database integration

Weekly Progress Summary (Work completed during this week):

During the third week, I learned the backend development concepts of the MERN stack using Node.js and Express.js. I learned how to create a server, configure routes and develop REST APIs using different HTTP methods. I also studied middleware and basic error handling. Further, I learned MongoDB and Mongoose for storing and managing application data. I implemented CRUD operations and connected the backend application with the MongoDB database. (26 June was a non-working day.)

Weekly Internship Report

Student Name:	Priyanka Raju Mohole	**Roll No.:**	4051
Company Name:	Zaalima Development Ptv Ltd	**Place:**	Bangalore
Week Duration:	From: 25 June 2026 To: 25 Aug 2026	**Reporting Week No.:**	4
Company Mentor:	Mr . Padmalabha Gouda		

Work Summary (Tasks/Activities Performed During the Week):

Sr. No.	Date	Task / Activity Performed
1	30 June	Introduction to Git and version control
2	1 July	Learned GitHub repositories, commits, push and pull
3	2 July	Practiced Git branching and merging
4	3 July	Connected React frontend with Express backend
5	4 July	Learned to consume REST APIs in React
6	5 July	Implemented full-stack CRUD functionality

Weekly Progress Summary (Work completed during this week):

During the fourth week, I learned Git and GitHub for source code management and version control. I practiced creating repositories, making commits, pushing and pulling changes, and working with branches and merging. I then integrated the React frontend with the Node.js and Express backend. I learned how to consume REST APIs from React and implemented CRUD functionality in the full-stack application. This week helped me understand the complete workflow of developing and managing a MERN stack project.

Weekly Internship Report

Student Name:	Priyanka Raju Mohole	**Roll No.:**	4051
Company Name:	Zaalima Development Ptv Ltd	**Place:**	Bangalore
Week Duration:	From: 25 June 2026 To: 25 Aug 2026	**Reporting Week No.:**	5
Company Mentor:	Mr . Padmalabha Gouda		

Work Summary (Tasks/Activities Performed During the Week):

Sr. No.	Date	Task / Activity Performed
1	7 July	Introduction to system design and functional and non-functional requirements
2	8 July	Learned client-server architecture and system components
3	9 July	Worked on database schema and API design
4	10 July	Studied authentication, security and scalability basics
5	11 July	Implemented and tested the final MERN stack project
6	12 July	Completed project documentation and updated the GitHub repository

Weekly Progress Summary (Work completed during this week):

During the fifth week, I learned the basic concepts of system design, including functional and non-functional requirements, client-server architecture, system components, database design and API design. I also studied basic authentication, security and scalability concepts. I applied these concepts to the final MERN stack project and performed testing and debugging. Finally, I documented the project, updated the GitHub repository and prepared the required internship documentation.
